FARMINGTON, MINNESOTA
The Gateway to the Twin Cities
Introduction

The prices on fine Irises, Peonies, Phloxes, Delphinium and Gladiolus, the finest flowers for the home have been reduced so materially the past few years that every home lover can easily acquire the finest of varieties for a small expenditure. There is a pleasure in growing beautiful flowers and in making your home attractive that cannot be anticipated. Named varieties increase this interest enabling you to look forward each year to a definite time when you can expect those certain varieties to bloom.

Rainbow Gardens has had the reputation for many years of growing the finest varieties and are constantly adding new and improved varieties.

You are invited to visit our Gardens and see our flowers in bloom. In our Exhibition Garden we have over 700 varieties enabling you to pick out the colors and varieties you prefer. We will be glad to help our customers at any time in making their selections.

We thank you for past favors and solicit your further patronage, assuring you at all times of our co-operation.

How To Order By Mail

Orders: When sending orders please use the Order Blank furnished with this catalogue, being very careful that your name and address are written plainly.

All orders are booked in the rotation in which they are received. The earlier they come in the more certain will be the patron of securing the plants and bulbs of his choice. All sales are made subject to stock on hand at time of filling order.

Terms: Cash should accompany each order. Remittances can be made by post office or express money order or bank draft or check.

On account of the expense of handling we cannot fill orders amounting to less than $1.00.

Prices: All prices in this catalog are net and will not be deviated from as we wish to treat everyone alike.

Shipping Facilities: We prepay delivery charges on Tulips and Gladiolus. Peonies and other perennials are shipped either by express or by parcel post the purchaser paying charges. We pack in cartons whenever possible and the charge for shipment, usually by parcel post, is a very small item. Customers who desire us to prepay express charges or parcel post can remit enough to cover and any surplus will be returned, or if preferred extra plants will be sent to cover the difference. We will deliver orders free of charge to either St. Paul or Minneapolis, or within fifty miles of our Gardens.

Orders for Irises, Peonies, Phloxes and other perennials received after the ground freezes in the fall will be forwarded early the following spring. Spring orders for Peonies if received too late will be forwarded in the fall.

Quality of Stock: We propose to send out strong plants and sound bulbs true to name and hold ourselves in readiness at any time to replace, on proper proof, any stock that may prove otherwise: but we shall not at any time be liable for any amount greater than the original price of the stock. Every purchase is made from us on these terms.

Complaints: If any, as to quality of goods, etc., can be entertained only when made immediately on receipt of goods.

Substitution: Carrying as we do, such a large number of varieties of roots, etc. it is obvious that at times, particularly at the end of a season, we may be unable to furnish some varieties. Therefore we ask permission to substitute varieties of equal merit in their place. On our order blank please fill in yes or no on the correct line. If you do not wish us to substitute we will return your money for the varieties not supplied. In case you write neither "yes" nor "no" we shall understand that you do not object to our substituting as above.

Packing: We make no charge for packing. After they pass out of our control we do not guarantee that they will live as we then have no control over conditions surrounding them and the care they will receive.

Our 1928 Message

Rainbow Gardens is located on the Jefferson Highway, at Farmington, Minn., only an hour's drive south of the Twin Cities over paved Highways. They can also be reached by railroad or by the Jefferson Highway Transportation Busses which stop at our gates.

Here we have some 22 acres planted in Peonies, Irises, Phloxes, Delphinium and other Hardy Perennials and Gladiolus, presenting a beautiful sight from May until November and attracting thousands of visitors.

In sending you our catalog, we hope that we may be the ones to help you add to the beautification of your garden and to receive your 1928 orders.

We have been in business since 1914 and since that time have tried out hundreds of varieties of our specialties in selecting our stock, eliminating those varieties from time to time which would not withstand the rigors of our Minnesota climate, where the temperature ranges from thirty below to one hundred above, so that our stock thriving here under such conditions of temperature will thrive in all parts of the United States.

Perennials and bulbs grow particularly well in our rich soil, enabling us to ship strong, vigorous roots and good sound bulbs to all parts of the United States, which should arrive in just as good condition as if our Gardens were close to you.

We are especially careful in sending out varieties true to name and our prices are based on such. Daily verifications of our varieties during their flowering period, assures the purchaser of accuracy in filling orders and enables us to give the best of service.

We carry the highest rated and reasonably priced varieties and in purchasing from us you are assured finer flowers for your garden.

We are always pleased to see you and to hear about your garden and your success with our roots and bulbs and trust to hear from you often during 1928.

John S. Crooks, Pres. & Treas.
Grace W. Crooks, Vice Pres.
Kathleen O'Donnell, Secy.

RATINGS

Peonies and Irises have been rated by the American Peony Society and the American Iris Society, these Societies having published Symposia of votes by their members upon the merits of the different varieties in general cultivation. Ten points means that the variety is perfect; 9 nearly perfect; 8 extra good; 7 good; 6 medium. The first number denotes the rating and the number before the name of the variety our field and catalog number. In some cases the variety has not been voted on and there is no rating. Gladioli have been rated by members of the American Gladiolus Society but in the case of Gladiolus 100 has been used as a basis of perfection instead of 10.

PEONIES (Hardy Perennials)

Flowering from May 25th to July 5th, depending on variety.

Peonies are amongst the best and most beautiful of the herbaceous plants. They are one of the hardiest and are adapted to almost any soil. They require but little attention and withstand intense cold winters with no serious effects.

Our stock of peonies has been selected from the highest rated and most reliable of the distinct varieties. We send our customers good three to five eye roots true to name and our prices are as low as we can possibly make them commensurate with the quality and correctness of the stock furnished. One and two eye divisions offered by some firms do not prove satisfactory, often developing into sickly or diseased plants and not flowering for a considerable length of time.

We also offer in many of the varieties two and three year clumps to enable our customers to obtain quicker results and a better showing in their gardens.

Planting and Care: Peonies may be shipped and planted in April and May before the growth is too far advanced and in the fall from early in September until the ground freezes in November. Plant from three to four feet apart. Do not cover the eyes or new buds with over two to three inches of soil. Too deep planting prevents blooming. Do not let manure come in contact with the roots as this will cause club root and sickly plants. Bone meal is a good fertilizer to use.

The first number denotes the rating of the peony, according to the American Peony Society, and the number immediately before the name of the variety our field and catalog number. As to ratings, see top of page. Remember we do not ship orders amounting to less than $1.00. See Page 2.

IRISES (Hardy Perennials)

Flowering from April 25th to August 1st depending on variety.

The Iris is a magnificent hardy perennial. They are the most satisfactory and beautiful perennial in the garden. They flower during a long period of time; require practically no care; multiply rapidly; grow in practically any kind of soil; are inexpensive; gorgeous in coloring, which with their fragrance gives them a charm not possessed by any other flower; they withstand extreme heat and cold and are the best drought resisters amongst the perennials.

The stately habits of Irises, their gorgeous effects, their wonderful coloring and their freeness of bloom have well entitled them to the name of the “Orchid of the Hardy Garden,” but Irises have the advantage of the orchid in delicacy of structure and in greater facility of culture.

Planting and Care. Irises should be planted in April and May as soon as the roots have sufficient growth to permit transplanting and in the fall from July 20th until the ground freezes in November. Fresh manure should not be used as a fertilizer as it rots the roots. Bone meal is always a safe as well as a good fertilizer. The roots should be planted so that the top of the root is at least two inches below the surface and from two to two and one-half feet apart. The dwarf Irises, however, can be planted closer. We advise covering all Irises with a light covering of marsh hay or straw as soon as the ground freezes, where winters are severe, to prevent the roots freezing out.

The first number denotes the rating of the Iris, according to the American Iris Society, and the number immediately before the name of the variety, our field and catalog number. As to ratings, see page 4.

In the descriptions of the Irises the S refers to the Standards or upright petals and the F to the Falls or drooping petals.

Dwarf Early Bearded Hybrid Crimean Irises
April and Early May Flowering Irises

These are excellent plants for permanent borderings or rockeries, growing from 6 to 18 inches high, and flower during April and May. They are very hardy, succeed in almost any soil or situation, thriving in a dry sunny location same as the Tall Bearded Irises. When planted in a double row, about four inches apart, they make a very effective edging. They can also be planted in front of the taller varieties.

Culture. Same as the Tall Bearded Iris.

Intermediate Bearded Irises

May Flowering Irises

The Intermediate Irises comprise a new group of hybrids derived mostly from crosses between the Dwarf Crimean Irises and the Tall Bearded Irises, forming an intermediate race, both in height, and period of blooming. The flowers are very large, most beautifully colored, growing from 12 to 18 inches in height and bloom two weeks before the Tall Bearded Irises, viz: from about May 10th to June 1st in this latitude, thus forming a connecting link between the Dwarf Crimean Irises and the handsome Tall Bearded Irises.

Culture. Same as the Tall Bearded Irises.

Tall Bearded Irises (Pogoniris)

Late May and June Flowering Irises—Fleur-de-lis

The flowers are large and exceedingly handsome and most of them deliciously fragrant and are in bloom during late May and June. Their beauty outrivals that of the Orchids in their delicacy of structure and wide range of coloring. There are the richest yellows, the most intense purples, delicate blues, the softest mauves and beautiful claret-reds. There are also whites, primroses and bronzes of every shade. They are especially adapted for flower borders, shrubberies, woodland walks and wild gardens and for surrounding lakes and ponds. If planted around pools or lakes they should be placed well above the water level.

**Beardless Irises (Apogon)**

These Irises are hardy and quite distinct from the Bearded Irises. They are tall and beautiful and a number of them may be treated as semi-aquatics.

No Iris, no matter how much it loves moisture, will thrive well where water stands in winter, except our native water flag (Versicolor) and the European yellow flag (Pseudo-Acorus) which may be grown partially in water, and are unexcelled for ponds and boggy places. Plant if possible in early autumn or spring.

**Beardless Irises—Section 1**

**Siberian Irises**

Beardless Irises—Section 2
Late June and July Flowering.

The Irises in this group, besides being handsome subjects for the flower and shrubbery border, may be planted by the waterside, but with their crowns above the water-level. The varieties are grand and stately plants, growing from 3 to 5 feet in height, with beautiful erect, dark green foliage, which retains its beauty until well into winter. Grown together in masses the effect is most striking and beautiful.

834—Guldenstadtiana Coerulea. Robust grower, foliage yellow in spring, changing to green and remains green until snow comes; flowers blue. July. 50c.

848—Spuria, Mrs. A. W. Tait (syn. Longipetala Superba). Porcelain-blue, with long pale blue falls, having a golden blotch at the base; fine foliage, free bloomer, and very hardy. Fine for massing. Foliage remains green until late fall. 3 feet. 35c each. $3.50 per dozen.

Beardless Irises—Section 3
June and July Flowering

Irises suitable for planting by the waterside, and in very damp or wet places. These will also do well in any good, loamy soil that is kept well cultivated and mellow.

824—Pseudo-acorus (The Common Yellow Water Flag). Bright yellow; suitable for marshes and water course. These and Versicolor varieties are the only Irises that may be safely planted where water habitually stands. 3 ft. May and June. 25c. $2.50 per dozen.

825—Versicolor. A native species, common to our streams and marshes, flowering in June and July, remaining in bloom a long time; very showy violet-blue flowers. 25c. $2.50 per dozen.

Japanese Iris (Iris Kaempferi) (Apogon)
Late June and July Flowering

The magnificence of Japanese Irises is such that no written description gives them justice. Some of the flowers measure from 10 to 12 inches. The prevailing colors are white, rose-purple, crimson, rose, lilac, lavender, silvery gray, purple, violet and blue; each flower usually representing several shades. They flower from late June to August 5th in this latitude.

Culture: These Irises are really semi-aquatic, and are seen in their full glory when grown at the water’s edge.

They can be planted either as a water garden plant, or in a dry location. They can be planted at the margin of streams or ponds. In dry soils they can be grown to perfection if the ground is kept hoed. Always cover Japanese Irises with a good covering of straw or hay during the winter as they require protection.

There is always a heavy demand for our stock. They cannot be imported now and it is getting more difficult each year to obtain stock. They do not usually attain sufficient growth in the spring for transplanting until after May 10th. We only sell mixed varieties.

Mixed varieties of Japanese Irises 30c each; $3.00 per dozen.

DELPHINIUM (Hardy Perennial)

Indispensable to the herbaceous garden, their long showy spikes of flowers continuing from June until frost, furnishing the most satisfactory different shades of blue to any color scheme, making the most wonderful effect in the garden. Many of the hybrids produce wonderful colorings, many having beautiful shades of mauve, pink and purple mingled with the various shades of blue. Our stock includes not only the always popular Belladonna and Bellamosum varieties, but the new Blackmore & Langdon and Wrexham strains, which have attracted so much attention and have been in such great demand the past year. Fine for backgrounds.

Culture: They grow well in any good cultivated soil. Fertilize with bone meal.

We advise our customers to send in their orders early to obtain stock.

Belladonna. Clear turquoise blue. 25c. 3 for 65c. 6 for $1.25. 12 for $2.50.

Bellamosum. Dark blue form of Belladonna. 25c. 3 for 65c. 6 for $1.25. 12 for $2.50.

Chinensis Album. A pure white form of the above. 25c. 3 for 65c. 6 for $1.25. 12 for $2.50.

English Hybrids. (Blackmore & Langdon’s best strains). Stands in a class by itself. From palest blues to deepest indigo with a strong run of the most delicate shades of rose, double and single. 35c. 5 for $1.00. 6 for $1.75. 12 for $3.50.

English Wrexham or Hollyhock Strain. Strong mammoth flowers of choicest mixed colors. 35c. 3 for $1.00. 6 for $1.75. 12 for $3.50.
Phloxes are hardy floriferous perennials, handsome for borders, in beds and amongst the shrubbery. For best effects they should be massed in solid colors of 3 or more roots of a variety. They can be used, however, as single specimens. They give a garden a wonderful color effect, flowering as they do from June until in October, and filling in a period between the Irises and Peonies and the Gladiolus.

**Culture:** They grow and succeed almost everywhere and in almost any position, and will do best in soil that has been enriched. Give a liberal supply of water during the flowering season. Plant at any time during the spring or late fall, spacing the roots from 15 to 18 inches apart. If the first spikes that bloom are removed as soon as over, they will produce a second supply of flowers continuing the display until late in the autumn. Clumps should be divided and replanted at least every fourth year. To prevent phloxes reverting to type do not allow them to go to seed. After freezing weather starts in in the fall cover the beds with straw or marsh hay as a protection.

Our Collection includes a number of the better varieties which produce large trusses of beautiful and brilliant flowers. Shipments are made in April and May and from Sept. 15th until the ground freezes.

Prices of all varieties—35c per root; 3 for $1.00; 6 for $1.50; 12 for $3.00. On Phloxes we allow you to make a selection of any combination of varieties you desire at these prices.

**Antoin Mercier.** Beautiful lilac with white eye. 
**B. Compte.** Deep rich ox-blood red. One of the finest red shades; strong and large.
**Beacon.** A brilliant cherry red.
**Champs Elysee.** Fine rich purplish-crimson of compact form. Early and exceedingly attractive.
**Europa.** New. Large, well formed white flowers with crimson-carmine eye. Very large individual flower and truss. Sturdy erect habit.
**Miss Lingard.** Waxy white with lavender eye. Longest spikes of any Phlox; blooms from the ground up. Earliest of flower and continuing for a long period.

**R. P. Struthers.** Rose carmine with claret eye. Very bright. Tall.
**Rynstroom.** Bright rose pink. Extra large flower and truss. Tall. Midseason to late.
**Thor.** A beautiful lively shade of pure salmon-pink, suffused and overlaid with a scarlet glow; has aniline-red eye.
**W. C. Egan.** A delicate lilac with fine large flowers. Widar. Bright reddish-violet with large white center. Fine head.

See Prices above. One each of the above 12 varieties, $3.00; 3 of each (36 plants), $8.50; 6 of each 72 plants, $16.00. Remember we do not ship orders amounting to less than $1.00. See Page 2.

**OTHER HARDY PERENNIALS**

All particularly fine perennials flowering from June until frost and giving a continuation of fine blooms for cutting. You will find that a selection of each of the following will prove most satisfactory.

**Coreopsis** (Lanceolata). A beautiful hardy border plant 15 to 18 in. high with bright yellow flowers in great profusion. July until frost. 25c.
**Gaillardia** (Grandiflora). A beautiful and desirable perennial, with scarlet crimson, bordered golden yellow flowers, blooming from June until frost. 25c.
**Hollyhocks.** We carry only a fine strain of double varieties of various shades of pink, red, crimson, yellow and white. 25c each.

**Pyrethrum** (Painted Daisies). Red, white and pink mixed. blooms in June and July, a most beautiful and hardy plant for the garden and for cutting. 25c.
GLADIOLUS (Bulbs)

For beautiful flowers from July until late fall there are none so dependable and magnificent or that give more satisfaction than gladiolus. As cut flowers, they have no peer and when planted in clumps and masses in the garden they invariably make a grand showing.

A number of exquisitely beautiful varieties have been introduced the past few years and after several years of experimenting and discarding we are offering a collection of the best and choicest varieties, any one or all of which the flower lover will be justly proud of. In purchasing gladioli bulbs it is best to get what is worth while and the best named varieties give the most satisfaction. By ordinary care and in cutting as explained below, your collection will steadily increase so that your garden will soon have a considerable showing.

When To Order The Bulbs. Orders for gladiolus are shipped in November, weather conditions permitting, and from April 1st until May 25th, when we plant our stock. Shipments ordered during the winter must be at the purchaser’s risk. We send out first-class, sound, northern grown bulbs of large size. Some varieties do not make as large bulbs as others, however. Send in your order as early as possible to assure early delivery and of the varieties desired for although we usually carry a large supply, the demand for our beautiful varieties is very heavy. All quotations are subject to stock being unsold on receipt of order. No substitution will be made except upon your directions.

Planting Instructions. If weather conditions permit start planting the first part of May and plant at intervals up to June 10th to secure a succession of flowers from July until late fall. It usually takes from 65 to 80 days from time of planting until flowering, depending on the variety, size of bulb, soil and weather conditions. If possible use a new location each year not planting in the same location oftener than every third year. If a good coating of manure is spaded in deeply in the fall and well spaded and pulverized in the spring, the soil will be in fine condition. If used only at planting, it is better to use high-grade commercial fertilizers such as bone meal, pulverized sheep manure or a liquid fertilizer applied to the soil near the rows but not too close to the bulbs. Deep planting is necessary in order to properly develop the new bulb which grows on top of the old one. Plant six inches deep with less on very heavy soils. Deep planting gives a heavy stalk and saves the necessity of using stakes. By planting the bulbs 4 to 6 inches apart in either single or double rows making your Gladiolus beds either round, oval, oblong or square and leaving a space of one and a half to two feet apart between the rows will allow sufficient room not only to plant a large number of bulbs but will give sufficient space between the rows for hoeing and cultivating and for hilling up the bulbs (same as for potatoes). This conserves the moisture around the bulbs and checks the growth of weeds and the space between the rows allows sufficient room to reach the flowers. To prevent soil crust forming keep the soil well worked. Thorough waterings in the evening during development aid considerably.

Cutting. When cutting the flowers leave at least two to four leaves. The bulbs need them to assist in their ripening. If the spikes are cut when the first buds open, their stems cut off a bit every day and the water changed, every bud will open. Treated in this way the flowers will last from ten days to two weeks.
Digging and care of the Bulbs. Before the ground freezes in the fall dig up the bulbs using a spading fork if possible. Take up the bulbs carefully if you desire to save the bulblets and cut off the stalk about one-half inch from the bulb. Allow to dry for a week or more before removing the old corm from the new bulb and the bulblets. The old corm is worthless and should be thrown away. Plant the bulblets the following spring in shallow trenches and the second year they should flower. After removing the old corm and bulblets allow the bulbs to be exposed to the sun or other heat until thoroughly dried and cured, then pack in bags or shallow boxes and place for the winter in a cool, dry place in the cellar where the temperature will not go below freezing point.

Ratings. The American Gladiolus Society has published a report with ratings on 150 varieties of Gladiolus from 65 large growers. Nearly all of our varieties have been included in this rating and those omitted will be rated later. See top of page 4.

As far as possible we give the name of introducer after name of variety. Prices quoted on Gladiolus include parcel post charges. No charge for packing. See directions for ordering on inside page of front cover.

Remember we do not ship orders amounting to less than $1.00. See Page 2.

On account of dry summers throughout the Country the past two years, which has effected the growth of bulbs, there is a prevailing custom of sending out No. 2 size bulbs (1¾ in.) instead of No. 1 (1½ in. up). We will continue however to send out No. 1 stock of any variety, reserving the right to send No. 2 stock when our No. 1 stock of any variety is exhausted. Both sizes give practically the same size flowers.

Six bulbs will be furnished at dozen rates, 25 at the 100 rate.

**Gift Boxes**

No gift is more acceptable to a flower lover than a gift of fine roots or bulbs for his or her particular garden. They can be of any of our Collections on page 18 or of any Special roots or bulbs desired to be sent. They make ideal Birthday, Anniversary or other Special Day gifts of lasting nature and affording continuous pleasure and remembrance.

They can be ordered any time, to be forwarded during the shipping season and when such Special Day comes during our Shipping Season we will do our part in forwarding the gift so it will arrive on the desired date. Also, if you desire we will notify the party of such gift to be sent to him and advise him when same will be shipped.

**Garden Planning and Planting**

In the Twin Cities or elsewhere, where the distance is not too great from our Gardens we have made arrangements so that we can plan and plant a Garden of our Specialties for you, which will give you the most beautiful of flowers from April until November. If you are interested and desire us to plan and plant your garden write us and we will be glad to take up the matter with you at once.

**At Our Gardens**

We carry certain plants, etc., for sale at our Gardens not listed in this catalog for the reason of difficulty of shipping for any distance, viz; Plants and Flowers for Easter, Mother's Day and Decoration Day. Plants for Window Boxes, Clematis Vines, Fertilizers, etc. Also throughout the Spring, Summer and Fall, we sell Cut Flowers of all of our specialties at very reasonable prices. We can supply Flowers in quantities for Weddings, Parties, Banquets, etc.
